

# NuVAX

## Configuration Form

Company	
Application	
System Name and Purpose	
VAX Model	Memory
Operating System	OS Version

### Disk Drives

#	Model	Controller	Size (MB)	% Util.	System Disk?	Shadowed	Striped	Device Address	Vector Address
1									
2									
3									
4									

Which disks are used as removable devices? \_\_\_\_\_

Are the removable disk used to exchange information with other system or only as backup? \_\_\_\_\_

### Tape Drives

#	Model	Controller	Tape Format	Used for Multi-Volume Operations?	Device Address	Vector Address
1						
2						

**Synchronous Connections**

#	Controller	Bit Rate	E1. Interface	Protocol	Connected to	Device Address	Vector Address
1							
2							
3							

**Asynchronous Serial Lines**

#	Controller	# of Ports	Bit Rate (T/R)	Connected to	Device Address	Vector Address
1						
2						
3						
4						
5						
6						
7						
8						
9						
10						

Ethernet Adapter		Protocols							
#	Controller	DECnet	TCP/IP	LAT	SNA	NetBUI	Other	Device Address	Vector Address
1									
2									

IEEE 488 Controller						
#	Controller	Port	# of IEEE Devices	IEEE Device Description	Device Address	Vector Address
1		0				
		1				
2		0				
		1				

Parallel I/O Controller					
#	Controller	Connected devices and usage	DMA (Y/N)	Device Address	Vector Address
1					
2					

Other Controllers					
#	Controller	Connected to	DMA (Y/N)	Device Address	Vector Address
1					
2					

### Software Applications and Middleware

#	Name	Function	Vendor
1			
2			
3			
4			
5			
6			

### Acceptance Test Plan

What programs or utilities do you use to verify operation and performance of your system?

What steps do you take to verify operation and performance of your system?

### Notes
